

# LIB-IT UPDATE

## Ladies and Gentlemen,

welcome to our first newsletter in 2010, where we will be updating you on all the latest developments at LIB-IT, including our products LIBERO and FILERO. In addition, we are going to report about new projects and partnerships which have been realized in the past few months.

We are particularly pleased to include a user report from Insight Dimensions GmbH, detailing their increase in productivity thanks to FILERO.

Another Highlight is waiting for you at 4. Leipziger Congress during the Company Exhibition from 15th - 17th of March 2010 at our stand: E03. Our co-exhibitor and cooperation partner Mr. Horst Herkner, Herkner Media Systems, will present the digitalisation of content for archives and libraries for the first time. Please find out more about the project on the following pages.

We also are looking forward to support our new LIBERO customer University Witten/Herdecke to the best of our abilities to manage the implementation of LIBERO as effective as possible.

We hope you enjoy reading the newsletter!

Yours,

**Dagmar Causley**  
Chief Executive, LIB-IT GmbH

## Guestbook on LIB-IT Homepage

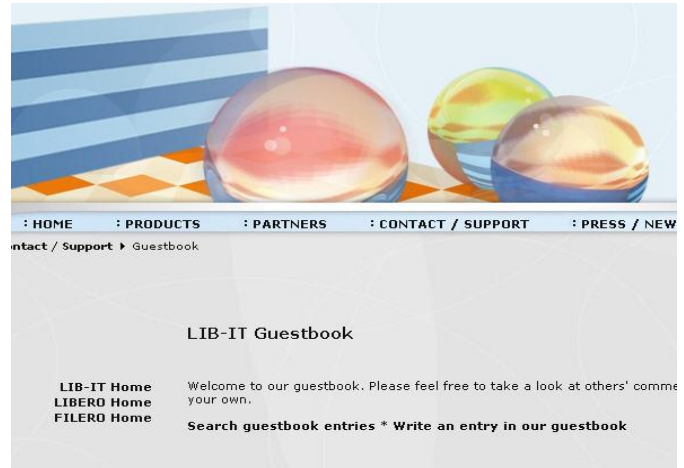

### Our Homepage has a guestbook now.

We invite you to use the guestbook for comments, suggestions or reviews regarding our homepage and products. Please feel free to send us your comments.

You can reach our homepage by using one of the following links:

- [www.lib-it.de](http://www.lib-it.de)
- [www.filero.de](http://www.filero.de)
- [www.libero.de](http://www.libero.de)

### We are looking forward to your input.

## New features in FILEROader

**The FILERO-Tool FILEROader had been expanded by a number of useful and attractive functions which simplify the interface definition and speed up the handling of data records.**

For example there now is a possibility to switch on/off all attributes for a selected class to import or export with just one click. This will simplify and speed up the interface definition. The new search opportunity "exact search" will simplify the achievement of explicit hits and enables the quite simple editing of much more data records.

The "turbo-function" which is documented in the FILEROader manual will support the reduction of the runtime.

While the interface is being executed the actually processed FID is shown as an active Link in the protocol window. This enables the user – mainly in the mode "Single step" - to control the result of the process in a simple way immediately in the relevant FILERO record.

In addition there has been established a brand new import/export-option. As from Version 1.7.1 all FILERO locations can be exported or set up via import.

## DMS-Expo Exhibition review

**In autumn 2009 LIB-IT DMS GmbH again attended the exhibition DMS EXPO (Digital Management Solutions) in Cologne.**

In our opinion this is currently the most important exhibition for Enterprise Content Management and Document Management (incl. E-Mail archiving).

# LIB-IT UPDATE

The presence of our co-exhibitor and partner company One Click Solutions expanded the benefit of the wide range of FILERO options by demonstrating the integration of the "One-Click-Products" ClickScanner, ClickReader and AutoClick in FILERO.

This integration simplifies the transfer of structured field content to FILERO significantly, e.g. for scanned invoices or delivery notes, and will show amazing economy of scale in a short period of time through a simple concept "Don't type! Click".

**We recorded our fair attendance as very successful!**

Our booth has been busy throughout all exhibition days and lots of new projects have been initiated.

## New LIBERO-Customer: University Witten/Herdecke

**We have won a new customer for our integrated Library Management System LIBERO: The University Witten/Herdecke.**

The university Witten/Herdecke is the first private university in Germany and educates students in following fields of study:

- Business Economics
- General Management
- Medicine
- Nursing Science
- Management of Healthcare and Social Organizations
- Dental Medicine
- Oral Rehabilitation
- Postgraduate program (Dental medicine)
- Philosophy and Culture

The library, whose stock is so far only listed in hbz-union catalog, is now working on a masterstroke: The Implementation of LIBERO Local System (including WebOPAC) for cataloguing, circulation acquisitions and serials, implementation of Online Cataloguing Services for LIBERO, BibMAPintegration for the WebOPAC, implementation of RFID technology (3M), integration of university card (InterCard AG) and connection to the Active Directory of the university for the Online-exchange of user data.

**Within the next weeks we will support the library to the best of our abilities to manage the implementation of LIBERO as effective as possible.**

## UcC: Unicode-Converter

**LIBERO Unicode Converter to download catalog records from a union system in their original language.**

More good News for LIBERO-customers, who are cataloguing in SWB (Southwest German Union System): The Unicode converter for SWB-catalog and authority data is now available. Adjustments for transfer from the hbz union system are still to come. With the support of the Unicode converter the SWB title data will be converted into Unicodeformat when using WinIBW single download. This will guarantee the correct display of all characters after the import to LIBERO. Furthermore the Unicode converter offers the opportunity to convert SWB bulk data deliveries as well.

Thereby the UcC offers all kind of conversion opportunities of the so far used mabt2d, for example for the automated generation of media types, the redirection of MAB-sub fields, the generation of sorting strings etc. All necessary rules and switches get defined separately.

LIBERO-customers will find a detailed description on our ftp-Server under ...\\technical instructions\\cataloguing.

**Please note:** With delivery of UcC the mabt2d development is discontinued, because UcC covers all kinds of conversion opportunities mabt2d included and so UcC completely replaces mabt2d.

## OCSL: Online Cataloguing Service for LIBERO

**Good news for all LIBERO-Libraries, who are a member of one of the supra-regional union systems in Germany: right away the new product OCSL is available.**

This service will guarantee that after cataloguing into the union catalog the title data and related local and authority data will get downloaded into the local LIBERO-Application of the library automatically and online.

Therefore the so far regularly required Batch-Updates with union data can be omitted.

Furthermore this service includes the opportunity for Aleph union systems that all item records will get uploaded from the local LIBERO-Database into the union database as MAB Holdings records and MAB Local records.

**LIBERO-customers will find a detailed description on our ftp-Server under ...\\technical instructions\\cataloguing.**

## The 4. Leipziger Congress is just upcoming

**Please visit us at 4. Leipziger Congress from 15th – 17th of March 2010 at the Company Exhibition on our stand: Ebene 0, stand: E03**

### One of our Highlights:

The presentation of the digitalisation of content for archives and libraries.

Our cooperation partner and co-exhibitor, Horst Herkner, Media Systems, will present the digitalisation of content for archives and libraries for the very first time in Leipzig on our stand.

Regardless if you would like to realise a million-pages-project or a valuable bibliophile rarity as a single project with a sophisticated individual solution, Herkner Media Systems possesses both capacity and the specialised Know-How for your individual requirement.

Herkners experience as publisher, publishing and library software developer, former publisher of BLS-Information service for public libraries and now as antiquarian and operator of the Internet market place for books BIBLIOMAN.DE will guarantee a professional realisation of order processing.

## Herkner Media Systems

**All other LIBERO-News we would like to show you during your visit at our booth.**

We are looking forward to see you in Leipzig!

## Case study FILERO: Increase in Productivity thank´s FILERO

**Insight Dimensions GmbH has very quickly succeeded in increasing productivity**

Please read the case study on our Homepage just follow the link

[Case Study Insight Dimensions GmbH](#)

## A new stage of life just started for Mrs. Perlbach, public library Hildesheim

**"A Journey through Time" in Library Histroy:** Please accompany Mrs. Perlbach on a review by following the link

[A Journey through Time, Mrs. Perlbach, public library Hildesheim](#)

## Preview of topic´s in the next Newsletter

# LIB-IT UPDATE

## New Cooperation:

- FILERO Workflow-Integration with AristaFlow [www.aristaflow.com](http://www.aristaflow.com)
- FILERO and E-Mail Management with Fischer Software [www.FischerSoftware.de](http://www.FischerSoftware.de)

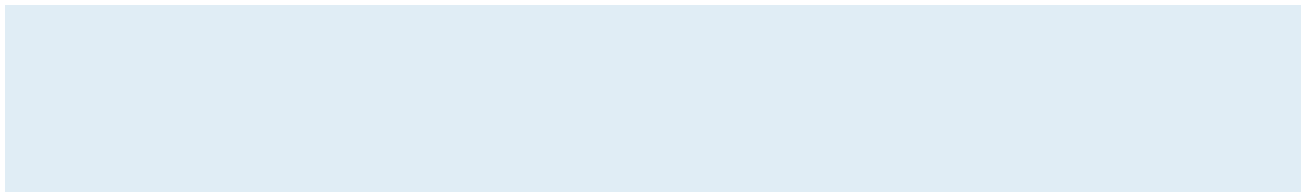

More details about the cooperation you will find in the next Newsletter.

## Further Topics:

- New FILERO features
- New Web 2.0 functionalities for WebOPAC
- New employees: the new faces at LIB-IT

Kind regards

LIB-IT Team
